

Problem Statement

Users in our target demographic struggle with providing streamlined user experience. Teachers often rely on excel spreadsheets to mark students and while it works, is often unreliable and the ability to improve the process is not possible or is janky. Most of the available options are one-sided in favor of the teachers when marking absences and tracking student attendance, while also being difficult for students to track and mark their own attendance.

Target Audience

Our product is specifically developed for universities' administrators, students and teachers.

Value Proposition

Our product offers streamlined applications for schools to manage students and courses. Ease of access to monitor multiple attendances between different classes under a course.

Key Features and Functionality:

Our product has many tools to help teachers and students to improve their quality of education.

- Manage students, create courses and assign classes to a course
- Students can mark themselves as unavailable, this makes teachers job easier as all the information is contained in the specific course and thus eliminates the need for students to send emails to teachers regarding this.
- Teachers can accept or deny absence requests
- Teachers can manage attendance of all assigned students
- Product shows information about general attendance when it comes to all the classes under a course

Goals and Objectives / Tavoitteet ja päämäärät

- Increase student satisfaction to attendance management
- Easy-to-use software, that anyone can use
- Reduce teachers' workload

Vision Statement / Visiolause:

Our vision is to bring a powerful optimized tool for schools to bridge the gap between teachers and students.
