

## **Team 6 - Sprint 5 review report (Illika Sinkonen, Daniel Juntunen, Veikko Jokinen)**

### **What has been done:**

- Expanded Product Backlog for Sprint 4 - 8
- Full Interface Localisation
- Github Updated for Localisatio information
- Resourcebundles for:
  - English
  - Finnish
  - Japanese
  - Persian

### **User Stories completed in specific:**

- Users should be able to select a language
- Users should be able to view the login page in the chosen language
- Users should be able to see the main interface in their chosen language
- Admins should be able to see the admin panel and misc creation tabs in their chosen language
- Users should be able to see profile information in their chosen language
- Users should be able to translate the interface into English
- Users should be able to translate the interface into Finnish
- Users should be able to translate the interface into Japanese
- Users should be able to translate the interface into Persian
- Expand the product backlog for Sprint 4 - 8 with stories regarding localisation
- Update Github repository with appropriate instructions about translation and tools used in translation

### **What is in progress:**

- Code Cleanup
- UI Window still shows titles in English
- In the admin panel, creation windows' text objects and buttons do not switch languages  
(This excludes text fields, which translate normally. Remaining objects also have their translations ready)
- Moving UI elements to the right when selected language is Persian

### **Obstacles we faced:**

- Implementing the translation functions in the correct position inside the scripts, realised that some scene loaders used showAndWait() which prevented some functionalities.

<i>Tiimiläisen Nimi</i>	<i>Annetut tehtävät</i>	<i>Aikaa käytetty</i>
<b>Veikko Jokinen</b>	Translation logic, Login- and Adminpage Localisation, English and Finnish. Trello Update.	~8 tuntia
<b>Daniel Juntunen</b>	Maininterface and Header localisation, Japanese and Persian.	~4 tuntia
<b>Ilkka Sinkonen</b>
