Team 6 - Sprint 6 review report
(Ilkka Sinkonen, Daniel Juntunen, Veikko Jokinen)

What has been done:

- Localization now works for admin panel's create windows
- UI windows title text localization implemented
- View, dao, and dao controllers classes have been refactored according to sonarQube's recommendations
- Statistical code review has been completed
- Database localization script

User Stories completed in specific:

- None (Sprint focus was mainly about refactoring)

What is in progress:

- More code cleanup
- Increasing Code Coverage

Obstacles we faced:

- When we refactored classes we introduced some bugs so we had to fix them
- A lot of duplicate string usage, which requires their own values to be used globally on the file
